

Community Lutheran Church & Saddleback Children's Center are working together on a recycling program.

**We are now collecting plastic bottles
and aluminum cans to help raise funds for
the school and church outreach programs.**

Recycling has become an everyday part of life. Teaching our children to recycle is an important life skill we need to pass on to them. Recycling is now essential to our environment; it saves resources and can be used to improve the communities we live in. Donating your recyclable items is an easy way to give back to the community.

Money earned through recycling will be noted in the school newsletter along with plans as to what that money will provide.

I am very excited about this program; by working together we will show our children how they can make a difference in their community and in the lives of others.

I am attaching a list of items that can be recycled through this program. Recycled items may be dropped off in the foyer, we will have a special can available for you to place your items in.

Thank You for your support,
together we can make a difference.
Sandra Starks

CR&R accepts all plastic bottles & aluminum cans marked CRV or California Redemption Value. Below is a list of beverage categories included and a sampling of products in each category.
